Create a new catalog

A catalog is the first layer of Unity Catalog's three-level namespace and is used to organize your data assets. [Learn more](#)

Catalog name

dev

Type

Standard

Storage location (optional)

sbit-managed

sub/path

abfss://sbit-managed-dev@sbitsa.dfs.core.windows.net/

Location in cloud storage where data for managed tables will be stored. If not specified, the location will default to the metastore root location.
